

# WHY IS LSI **THE MARKET LEADING MANUFACTURER** OF RADIO CRANE OPERATOR AIDS/SAFE LOAD INDICATORS?

## COMPANY

- Worldwide locations in Houston (TX, USA), Quebec City (Canada), Dubai (UAE), Australia and the UK
- We design and manufacture all of our technology and radio chips in-house, giving us complete control of how, where and why our products work
- Intense market research and development of products
- When designing our technology, we consider your needs and the reality of what will actually work in the field
- Technical support available 24 hours a day, 7 days a week
- Our sales reps have backgrounds in crane sales and crane repair, which means that they have the ability to competently assess your needs and provide you with the most effective solution possible
- LSI posts an average annual growth of 30%
- Our technology is not limited to the crane & lifting industry alone; LSI wireless technology is ideal for manufacturing, oil & gas, warehousing, distribution, industrial sensors, agriculture, food processing and other custom applications

## PRODUCTS

- FCC & CE approved versions available
- Standard 2 year warranty, simple parts exchange minimizes downtime
- LSI Displays & Sensors feature potted electronics to protect from water intrusion
- Explosion proof transmitters available with CSA or ATEX certification
- Powered by military grade D Cell Lithium batteries; products also compatible with D Cell Alkaline batteries
- Standard transmission range of 4,000 ft / 1,300 m
- Sensors are interchangeable with any compatible LSI Display, allowing for an easy swap depending on intended use
- Diverse and flexible systems allow for products to be used in a wide array of applications
- Easy to install, easy to use
- 99% of our systems can be supported over the phone, eliminating expensive field support calls
- Products available in English, Spanish, Portuguese and French
