

LOAD PINS

THE MOST FLEXIBLE AND ACCURATE ALTERNATIVE TO LOAD CELLS

An LSI Load Pin is the ideal solution for many applications in the crane & lifting industry. Specifically, our load pins are most effective when hook height is an issue that cannot be compromised.

LSI builds custom load pins to suit a wide variety of applications. If your application dictates that maintaining maximum hook height is critical, then LSI can provide you with a load pin/wireless transmitter solution to suit your needs.

We will work with you on an application analysis to determine a “best fit” solution.
